

YOUR NEW INSPIRE ROUTER FOR FIBRE BROADBAND

Yay!

You have received your new router!
The excitement around your new Internet connection builds!

What's inside my Netcomm router set-up pack?

Your router

This will already be configured by our team and ready to go. Give us a call if you need any specific changes.

Wireless key card

Including your WiFi password

x2 Ethernet Cables

WAN on router (A) to ONT port 1. Plug into port 1 on the bottom of the ONT on the wall. Extra cable for plugging in your computer, AppleTV etc.

Telephone Cable

Plug into Telephone Port 1 (B) on router and to your phone.

Power adapter/unit

Only use this power adapter with your Inspire router.

Plugging everything in

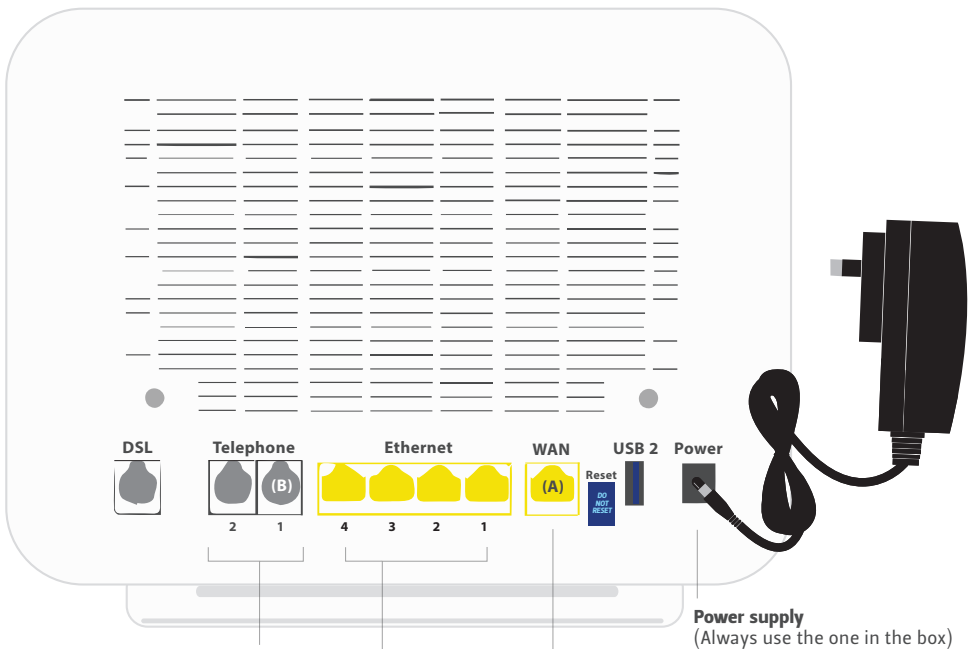

The card in your set-up pack has the Wi-Fi Security Key, plus you'll also find this on the bottom of your new router.

You'll know everything is plugged in correctly when the lights for power, Internet, Wi-Fi and telephone (if you have Voice) come on, this may take a few minutes after powering on.

Connecting to Wi-Fi

1. Using your mobile device, scan for the Wireless Network Name (On the front of your Wireless Security Card).
Need to change the WiFi name? Give us a call.
2. When asked for your wireless security settings, enter the Wireless Security Key on your card.

Your telephone (Use Port 1)

Your computer, laptop, Apple TV etc
(Ethernet is best)

Optical Network Terminal (ONT)

An Optical Network Terminal or ONT, is installed in your building. This terminates the fibre inside your property. You will need to plug a cable from your routers WAN port into the ONT's GE1 port. When done correctly, the ONT's LAN1 light will turn either green or orange.

Any problems? Give us a call: 0800 484 363
